

Post-Doctoral Position in Atmospheric and Planetary Circulation

University of Exeter

College of Engineering, Mathematics and Physical Sciences

Prof. Geoffrey K. Vallis

A postdoctoral position is available in the area of the dynamics and general circulation of the atmosphere of Earth and/or other planets. The position will be filled at the level of Associate Research Fellow or Research Fellow, depending on experience, for a period of 36 months. The position is available immediately, or from a mutually agreed time in the future.

The post will involve numerical modelling and theoretical activities concerning the large-scale circulation of planetary atmospheres, investigating planetary regimes, jets, and the relation of the circulation of Earth to that of other planets. Experience in numerical modelling is highly desirable. The successful applicant will be able to present information on research progress and outcomes, communicate complex information, orally, in writing and electronically and prepare proposals and applications to external bodies.

Applicants will possess a relevant PhD (Meteorology, Physics, Astronomy, Mathematics, or a related discipline). At Research Fellow level, the successful applicant will be a nationally recognized authority in atmospheric, planetary or geophysical fluid dynamics and be able to develop research programmes and methodologies. Candidates will have demonstrated the ability to carry out creative, innovative, independent research and to publish in peer-reviewed journals.

Please contact Prof. G. K. Vallis at g.vallis@exeter.ac.uk for further information.

Job Details

Apply at: <https://jobs.exeter.ac.uk/>

Job title: Associate Research Fellow/Research Fellow

Job reference: R46605. Application closing date 29/01/2015 (UK convention)

Salary: £25,513 on Grade E up to £33,242 on Grade F, depending on qualifications and experience

Package: Generous holiday allowances, flexible working, pension scheme and relocation package (if applicable)

Job category/type: Research

Job description: Associate Research Fellow/Research Fellow in Atmospheric and Planetary Circulation

The College is working towards department Silver Athena SWAN awards as a commitment to providing equality of opportunity and advancing the representation of women in STEM/M subjects: science, technology, engineering, mathematics and medicine.
